Building manager
[Person]
monitors, overrides
Offline training
[Software System, optional]
generates data, trains the models
Occupants
[Person]
sensed, evacuated
history, decision log [Grafana];
manual commands [MQTT]
model files
(fire, anomaly, spread)
views fire, smoke, doors,
routes, alerts [HTTPS/WebSocket]
Fire Detection & Evacuation
[Software System]
detects fires, suppresses, closes and
unlocks doors, plans the evacuation
presence, position
(entities, occupancy)
reads environment and doors;
writes actuators, doors, alerts,
highlights, coverage [REST]
BuildSim
[Software System, provided]
building model, shared state,
3D viewer (WebSocket)
